

Tall Tales: Technical Requirements

Arrival & Setup

The performer will arrive an hour and 45 minutes before the scheduled show time. The space will be ready for the audience to enter 15 minutes before show time.

If load-in is more than 100 yards from car to stage, above the ground floor, or involves any other complication, please inform us ahead of time so that we can allot extra time.

Parking

This show travels in with one vehicle. If parking is not available on the premises or within the immediate area, let us know so that we can plan to arrive earlier to allow for parking time.

Space Requirements

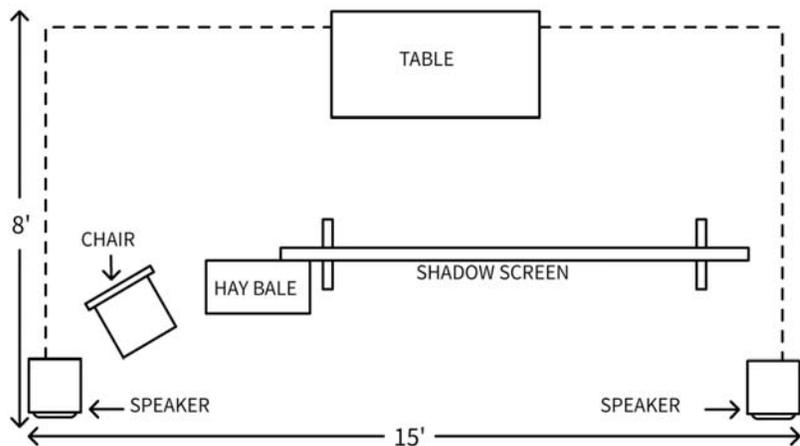

Minimum space dimensions of stage area (not including audience seating)

Width: 15'

Depth: 8'

Height: 9'

Performer requires a nearby bathroom or dressing space to change into costume.

Space must be clean and free of furniture or other obstructions at arrival. If the stage is not ready when we arrive, we may not be able to begin the performance on time.

Lighting and Sound

This show travels with its own PA system with wireless microphones. Because this show uses shadow puppets, please ensure that the room can be darkened. It requires at least two standard outlets available within 20' of the stage.

Running Time

This show consists of many short stories and songs with a total running time of 50 minutes. It can also include a puppet demonstration with a question and answer session at the end.

Strike and Load-out

This show can be struck within one hour, barring any of the issues mentioned in the "Arrival & Setup" section (parking far away, performance space on higher floor in building etc.).

**If you have any questions or if your venue does not meet the requirements, please contact the performer directly:
